WORK EXPERIENCE

BAE Systems, Inc. Feb 2025 – Mar 2026
Software Engineer II (Full-stack) Hill AFB, UT (hybrid)

- Designed, modified, and implemented React code for front-end web applications.
- Wrote Node.js and Python APIs with corresponding unit tests.
- Wrote stored SQL queries used dynamically within applications.
- Worked with ArcGIS on mapping layers for web applications.

Overseas Military Sales Corporation Oct 2022 – Feb 2025
Software Engineer (Full-stack) Woodbury, NY (remote)

- Designed and coded a web scraper to fetch, parse, and process CSV files from vendors.
- Modified the Angular websites to handle .webp images based on a hierarchy of available image types, and automated conversion of the images stored in S3.
- Wrote Java (WildFly, formerly JBoss) APIs to manage data aggregation, email and SMS survey sending, and data processing.
- Wrote AWS Lambdas in Python and Node.js to handle cron jobs, react to business events, replace existing APIs, and handle monitoring and alerting.
- Wrote unit tests with JUnit (Java), Mocha (Node.js), and unittest (Python), and API tests with Postman.

Stride Inc. Jun 2022 – Aug 2022
Software Engineer (Platform) Intern Herndon, VA (remote)

- Researched, designed, developed, and tested a data-reconciliation module in Java.
- Wrote Serverless Framework YAML to automate code deployment to AWS.
- Wrote Liquibase scripts to manage Postgres database schema changes.

Manic Kat Records May 2021 – Jan 2022
Software Developer (Web and Mobile) Intern Pomona, NY (remote)

- Designed, built, and tested a web-based admin site.
- Corrected, modified, and added features to an existing mobile app.
- Established SDLC and development best practices for the coding team.

Goldman Sachs Sep 2018 – Feb 2020
Support Engineer (Systems Administration) Salt Lake City, UT

- Administered Unix (RHEL) and Windows systems, users, and computers.
- Wrote scripts to automate repetitive tasks.

CSS Corp Jun 2018 – Sep 2018
Technical Support Specialist

- Resolved computer and network issues for non-technical users: malware removal, backups, network and email setup.

Vantiv Integrated Payments Mar 2016 – Nov 2017
Technical Support Specialist

- Troubleshot hardware, software, and networks for card-payment solutions, including financial reconciliation to rule out technical errors.

EDUCATION

Southern New Hampshire University Sep 2017 – Apr 2022
BS, Computer Science, Software Engineering focus (3.82 GPA) Manchester, NH

PROJECTS

See ianhefflefinger.com for projects, including this site, rebuilt three times on AWS (S3, CloudFront, Route 53) with automated GitHub Actions deployment.

SKILLS

Languages	Java, JavaScript and Node.js, Python, SQL, Bash, PowerShell, Batch
Web	React, Angular, Bootstrap, HTML, CSS, ArcGIS mapping layers, API development and consumption
AWS	Lambda, EC2, S3, CloudFront, Route 53, DynamoDB, CloudWatch, Secrets Manager, SNS, SQS
Azure	Function Apps, Cosmos DB, Azure Artifacts, Azure DevOps
Data	Postgres, MySQL, MongoDB, DynamoDB, Liquibase schema migrations
Practice	Unit and integration testing, git, SDLC, Atlassian tools, Linux, macOS, Windows administration
